New 2205 Duplex Stainless Steel Brochure from IMOA

PHOENIX, AZ, October 3, 2011 - The International Molybdenum Association (IMOA) has published a new brochure titled "The Use of 2205 Duplex Stainless Steel for Pharmaceutical and Biotechnology Applications." The brochure summarizes the properties that make 2205 duplex stainless steel an ideal candidate for demanding high purity pharmaceutical applications. The performance of 2205 duplex stainless steel is compared with the other stainless steel materials often used in these applications.
